

Splash

# We clean water for kids.

## About Splash

Splash is at the forefront of a growing movement to ensure that children in urban poverty have the resources they need to thrive and realize their full potential. We design and implement child-focused water, sanitation, hygiene (WASH), and menstrual health solutions with governments in some of the world's biggest cities. And then we get out of the way: our goal is to demonstrate that our model works, build local capacity, and transition management to local organizations and governments.

We partner with government agencies and local organizations to install water filters, water storage tanks, drinking water and handwashing stations, build and/or upgrade toilets, train teachers and administrators, and run programs around behavior change and menstrual health at government schools. Founded in 2007, Splash has worked in eight countries and served more than one million kids worldwide.

## Splash Initiatives

Safe, clean water

Child-friendly toilets

Handwashing with soap

Menstrual health support

Behavior change

## Project WISE

In 2019, Splash launched Project WISE (WASH [water, sanitation, and hygiene] in Schools for Everyone), a bold idea to provide WASH services to every child in public schools across two cities in India and Ethiopia. To date, we've **reached over one million kids, dramatically reduced operational costs, and leveraged more than \$11M in government funding.**

Over the next five years, we aim to reach **millions of children** by expanding our programming in East Africa, South Asia, and the Middle East.

### Looking Ahead

Building on our track record of success and learnings from our work, we plan to launch the next phase of Project WISE in East Africa, South Asia, and the Middle East – all areas of rapid population growth and in regions that face critical challenges in water, sanitation, and public health. We aim to prove, once and for all, this can be done effectively.

**Join the movement  
to bring clean  
water to kids  
around the world at
